RECOMMENDED CLINICIANS
& PRACTITIONERS

RECOMMENDED CLINICIANS & PRACTITIONERS

Dr. Izabella Wentz introduces a revolutionary breakthrough in understanding hypothyroidism and Hashimoto's disease. Her book has been mailed to the individuals in this list. These are clinicians that have been recommended by patients. Each clinician has been mailed a book and those that have a "YES" by the name have read the book: [Hashimoto's Thyroiditis: Lifestyle Interventions for Finding and Treating the Root Cause](#).

You can check for updates to the practitioner directory online [here](#):

Individuals should use their own best judgment when receiving the services of any healthcare practitioner, especially when inquiring about the practitioner's qualifications, malpractice cases, ethics, and business practices.

The results provided are randomly produced based on the search criteria inputted by the user and may vary each time the search is performed. This website is not a referral system or a recommendation of any healthcare practitioner. Dr. Wentz strongly advises all people to thoroughly research any healthcare professional before engaging their services.

WHY DOESN'T MY DOCTOR UNDERSTAND HASHIMOTO'S?

Every day we receive emails from patients who are frustrated with the service they receive from their clinicians. Finding a clinician that understands Hashimoto's and hypothyroidism is no easy feat, which is why I've asked for my readers to submit their own recommendations. In line with my mission, I have sent a complimentary book to each of these clinicians and health coaches, so that you will be able to work with them directly on the research and protocols from my book.

As I receive [patient submissions](#), I will follow up with each clinician and will highlight those that have read the book.
